

Job title – Product Designer

Post Location - 121 George Street Glasgow, Scotland

Salary – £ 35,000 ~ 40,000, negotiable depending on experience.

Hours – Full Time 37.5hrs/week Mon-Fri. arbnco offers a flexible work environment.

Job Brief

As **product designer** at arbnco you create products in the prop-tech industry. We are looking for someone with **mid-level** experience, a hands-on mindset and **strong visual skills**. Bonus points if you have experience with **agile environments or design systems**.

You will join our Product Engineering Team, collaborating closely with the Development Team. Collectively you will own the product look and feel, delivering UI mockups, prototypes, MVPs, and final products. Additionally, you will help to structure our design enhancing our design processes, advancing our scalability, efficiency, consistency, and usability to the next level.

- **Product Look and Feel.** You will be building clean UX & UI from wireframes to engineering handover.
- **Collaborating with product & engineering.** Our ultimate goal is to ship great user experience quickly. Therefore, you will work together tightly with product engineers and developers to find efficient ways to solve challenges.
- **Improving our design process.** Your experience and ways of working can contribute new ideas to our design process to make us develop features faster.

Responsibilities

- Participate in activities from design to delivery for arbnco family products.
- Use your (concept) designs to facilitate alignment.
- Deliver thought out design flows and interaction patterns.
- Connect with Engineers to find elegant and creative solutions.
- Ensure consistency across all our mobile and desktop app products.
- Collaborate with product management around product roadmaps and prioritization.
- Be proactive and flexible; Weigh in to shape the team and your role.

Requirements

- You have 3+ years of experience in designing production-ready, cross-platform products for iOS, Android, Desktop.
- You've made complex user workflows look easy, ideally in a SaaS context.
- You have a portfolio that shows your experience in designing digital products, your design process, interaction design and visual design skills.
- You are willing to work in Figma.
- You are fluent in English.
- Nice to have, but not a requirement:
 - Experience with data visualization
 - Experience with building management software.

Inovo, Ground Floor Suite F, 121 George Street, Glasgow, G1 1RD.

About arbnco

arbnco offers a cloud-based software platform for delivering commercial real estate improvement analysis to determine retrofit strategies for mitigating risk and improving financial performance of commercial real estate by:

- Reducing risk associated with inefficient property within the context of climate change.
- Improving asset investment performance, reducing operation costs and increasing value.
- Cost effectively generating strategic energy reduction scenarios.
- Expediting and safeguarding transaction processes and open up site specific retrofit opportunities.

arbnco is transforming the way commercial real estate looks at energy efficiency improvements. We started our journey in 2009 with an idea and a rented desk in central Scotland. Since then, we've grown into one of the leading software providers to the UK real estate market, working with some of the world's largest property investors.

Together with our clients and their customers, we're saving energy, saving money, and helping reduce carbon emissions.

This falls under Visa & Immigration SoC Code 2137 Web Design & development professionals.

Closing Date for post – 3rd November 2023.

Start Date – 06th November or soonest thereafter.
